

MetaProducts AutoDialogs

Speed up your folder work!

Easily access your favorite folders from any Open/Save dialog

You spend a lot of time navigating through the folders on your disks. Most of the time you browse to 10 folders or less, so not have a convenient tool to access the most used folders with one keystroke or mouse click? AutoDialogs is that tool! Run AutoDialogs at start up and you are just a click or hotkey away from the folder you need. With an easy interface and small system footprint, this handy application will save you time and effort. You will appreciate AutoDialogs, a quick and easy utility to move you to a particular folder.

Product Description

AutoDialogs is a Windows utility that gives you quick access to the folders you use most often in your standard Windows Open, Save As, and Browse dialogs. Instead of wasting time moving up and down file trees when looking for your documents, AutoDialogs lets you automatically insert pre-selected folders into your dialog boxes.

Software Compability

AutoDialogs works with Windows Explorer, all of the Microsoft Office products (including the new Open/Save dialog boxes in Office 2000 and XP Professional), and all standard Windows 95/98/Me/NT4/2000/XP/2003 applications.

Appearance

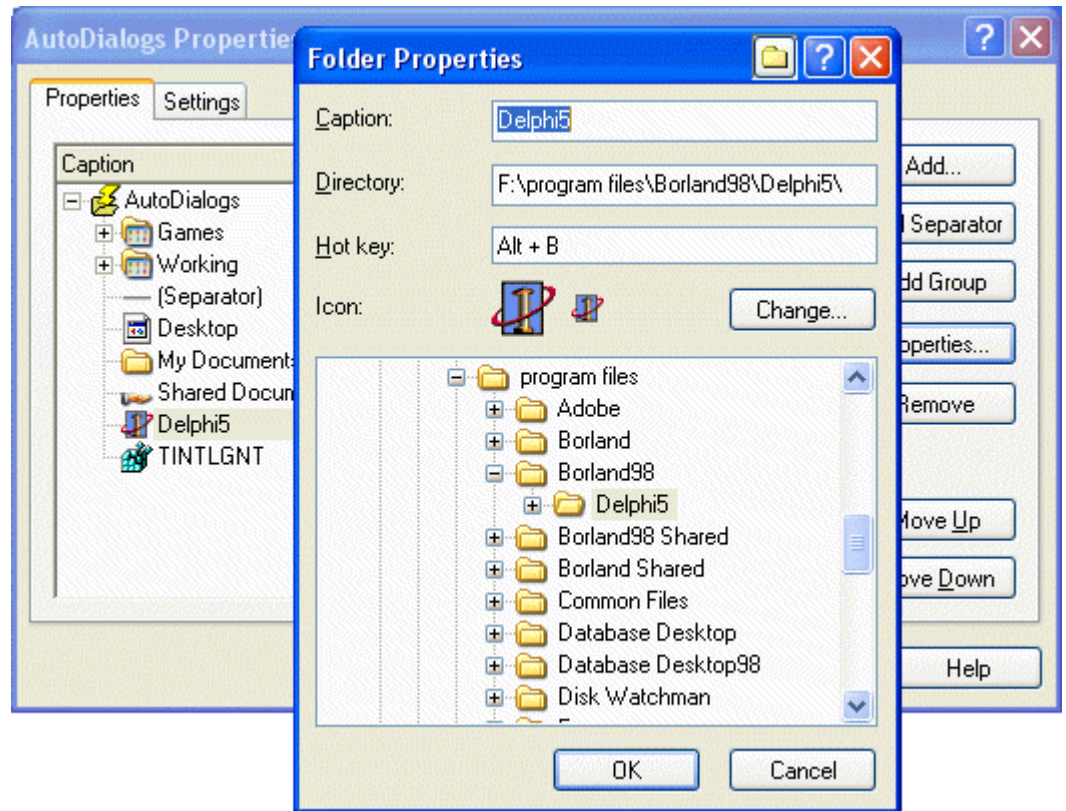

The AutoDialogs icon resides conveniently in the System Tray, and also appears in the title bar of all Windows Open/Save As/Browse dialogs. By clicking the AutoDialogs icon, you can choose your favorite folders with just one additional click. AutoDialogs lets you assign an icon to your folders, making the selection process even quicker. A hotkey makes your favorite folders just one keystroke away. AutoDialogs eliminates the many mouse clicks ordinarily required to point to the folders containing your documents.

For Power Users

Power users will appreciate AutoDialogs' ability to speed navigation through the registry keys in Microsoft's Registry Editor (RegEdit). All users will appreciate the time saved accessing folders without navigating file menu trees.

System requirements:

- Microsoft® Windows® 95, Windows 98, Windows 98 Second Edition, Windows Millennium Edition, Windows 2000, Windows NT® 4.0, Windows XP or Windows 2003
- 64MB of RAM, or the minimum memory required to run Windows
- 1Mb of available hard-disk space
