

# MetaProducts Disk Watchman

## Easy control over all your files and disks

Do you know how much free disk space you have and if it is enough for your work? Can you find additional disk space when you need it? Disk Watchman provides a simple visual representation of this vital information in a floating bar or right in the system tray.

### Product Description

Disk Watchman is a Windows application that monitors your hard, removable and mapped network drive resources. It displays free and used disk space on a real-time basis. You will be able to see when your free disk space falls short of certain values.

### Get even more disk space reserves

Disk Watchman contains rapid tools to find disk space reserves (backup, temporary and old unused files.) Free up more space effectively with its intuitive and fast user interface. Find and eliminate duplicate files that waste disk space. For example, if you copied a media file and forgot to remove the original, Disk Watchman will alert you to the duplication.

### Notifications

Receive notifications about low disk space, even when you are away from your computer. You can be notified by e-mail, sound or other options. Start any application that consumes disk space actively and be confident that you will not run out of space.

Some common examples are - Web site downloads, audio/video capture, installing applications and games.

Using an E-mail to SMS gateway, you can receive disk space notifications to your mobile phone as well.

### Monitor file system changes

Advanced users will be pleased with the ability to monitor file system changes. You can record the file system state and then create a comparison report to see which files have been added, removed or changed.

### Easy to use

Disk Watchman provides a simple and comfortable user interface, easy to understand setup and full control over the visualization process.

### Rapid disk tools access

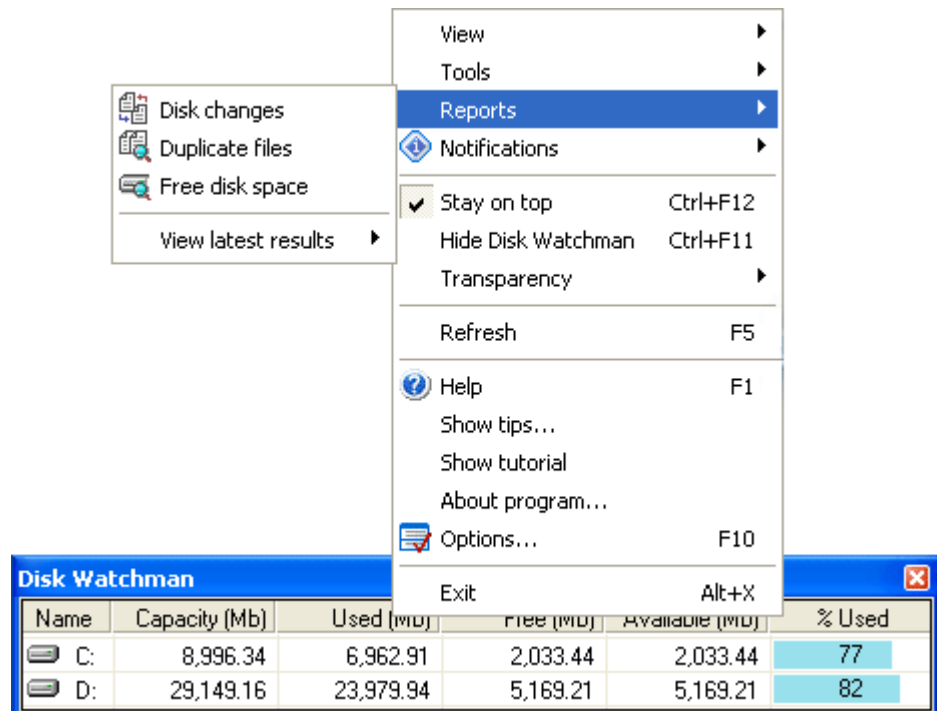

Disk Watchman provides a quick access to specified tools and utilities. Just right-click the disk line in the program's window and select a tool to start for this disk. You can easily configure the tool set to fit your needs.

## System requirements:

- Microsoft® Windows® 95, Windows 98, Windows 98 Second Edition, Windows Millennium Edition, Windows 2000, Windows NT® 4.0, Windows XP, Windows 2003 or Windows Vista
