

MetaProducts Inquiry

Keep important web pages forever.

Collect, organize and view information from the Web on your terms, quickly and easily.

Product Description

If you are looking for a way to store web information (pages, images and other content) on your disk, so it never expires or disappears, then Inquiry is the right tool for you! It is integrated with the most popular browsers and its features (save, search or browse saved pages) are available with a single click.

Even if the Web site stops responding or the contents change, you will be able to browse the pages just as they were stored originally. You can also save web sites for offline browsing with the help of the AutoSave mode - when it is enabled, all pages you browse will be automatically stored in a special folder in Inquiry.

Inquiry stores various Web files: entire web pages, selected text and images, Shockwave Flash clips and many others. It can import documents from your Favorites and export them to various formats to share with friends and colleagues. Forget cumbersome open and close dialog boxes. Managing your stored pages is quick and easy.

Simple to store web pages

You access Inquiry simply by clicking a button on the MS Internet Explorer toolbar or Inquiry Sidebar. A single click saves the page you are currently browsing, or your selected text or images. You can choose to display or hide the Inquiry Sidebar by selecting the Internet Explorer Toolbars menu entry from the View menu and then selecting Inquiry Bar.

Easily share collected data

Using Inquiry you can email stored pages with a couple of clicks. It is easy to convert a page into a convenient format, such as HTML Help file or MHT Archive (to reduce the file size,) Microsoft Word or to a small executable file that includes a compact IE-based browsing application.

For both professional and novice users

Inquiry is sophisticated enough to meet the needs of professional researchers, yet simple enough for novice users. Researchers, lawyers, writers, scholars, professors, students or just the casual shopper will all find Inquiry just the tool they need to collect, store and manage any type of Internet information. Inquiry eliminates the concern that information on the Internet today will be gone tomorrow – it puts control of the Internet files in your hands.

Fast storing

Inquiry stores pages much faster than the regular Internet Explorer Save As feature.

Instant search

Inquiry allows you to quickly search in all collected pages and displays the search results in a separate tree folder, allowing you to view them. It is also easy to organize your stored items as you wish, divide them by theme and purpose, sort in the order you need using drag & drop or using standard ordering methods.

Typical using scenarios:

- **Teachers, Researchers and Writers.** Do you study remotely and need to have all necessary information on your local computer? Inquiry will help you gather Internet pages and articles for your assignments and work with them offline. Using Inquiry, you can save all citation and reference information, and design your own reference styles to be stored with each document.
- **Shoppers.** Are you searching for the best price of a product on the Internet? Catalog and store all the pages you have found and review them later at your leisure. Inquiry can help compare products and prepare reports and presentations.
- **Sales, Marketing and Public Relations professionals.** Inquiry makes it easy to save and organize Web site information on competitive products and services.
- **Legal Professionals.** Using Inquiry, you can organize and store information from government sites as well as research sites such as Westlaw and Lexis.
- **Students.** Are you studying for a test or doing research for one of your classes? Inquiry provides a fast and easy way to find, save and analyze the information you need--when you need it.

System requirements:

- Microsoft® Windows 98, Windows Millennium Edition, Windows 2000, Windows NT® 4.0, Windows XP, Windows 2003 or Windows Vista
- 64MB of RAM, or the minimum memory required to run Windows
- 5Mb of available hard-disk space + space for stored web pages
