

MetaProducts Links Organizer

Make sure that all links in your Favorites and Bookmarks are up to date!

Product Description

Links Organizer shows you all your Favorites, Bookmarks and links in the Start menu and lets you check to see if they are still valid. If they were moved to another site, the program will automatically make the correction. It is also simple to move links from one folder to another, exchange them between browsers and so on.

Using a familiar Explorer-like tree structure, Links Organizer makes it easy to add, delete, inspect, verify, edit and exchange links from the top Windows browsers. Whether you're using current or older versions of Internet Explorer's Favorites, Netscape Navigator's or Netscape Communicator's Bookmarks or Opera's Hot Lists, Links Organizer makes it simple to move or copy links from one browser's bookmark system to another. You can drag and drop links or use the clipboard to manage them.

Easy to use

The program is fully configurable, allowing users to run it in the system tray, launch the program at start-up and confirm deletions for links that have gone bad.

Whether you're trying to migrate from one web browser to another, concerned about speeding your Internet use by verifying web links on a regular basis or just interested in saving time by managing your local and browser links more efficiently, Links Organizer will save hours of time and frustration.

Find duplicated links

Links Organizer also allows you find all duplicate links on your system and manage them to clean up your folders.

Schedule link checks

Links Organizer's built-in scheduler visits the Internet and verifies all of your links. The program will make your Internet experience more efficient and enjoyable by updating links that have been redirected. It will also identify bad links so you can correct or eliminate them. Links Organizer notifies you when links have changed by playing a sound or sending you an e-mail.

Storing form contents

Another exciting feature of Links Organizer is the ability to remember HTML form contents in a link. An internal browser is included to make browsing different links easier and to enable browsing from one place.

Windows shortcuts and file links

Links Organizer also manages links on your local disk, including the Windows Start Menu, Desktop, Quick Launch bar and Recently Used Documents. By eliminating outdated and broken links that point to files and documents that you've already removed or uninstalled, Links Organizer frees disk space, shrinks the Start Menu, Favorites and other categories and makes your system run more efficiently.

Adding a recently used document to your Desktop or Start Menu is as simple as dragging and dropping it in Links Organizer's intuitive interface. The program makes it easy to move Internet links to any of these local disk categories, too, as it works seamlessly between Internet and local links. Just as Links Organizer's built-in scheduler can verify Internet links, it can also be used to verify that programs and document files are accessible. You can even launch programs and files directly from Links Organizer.

System requirements:

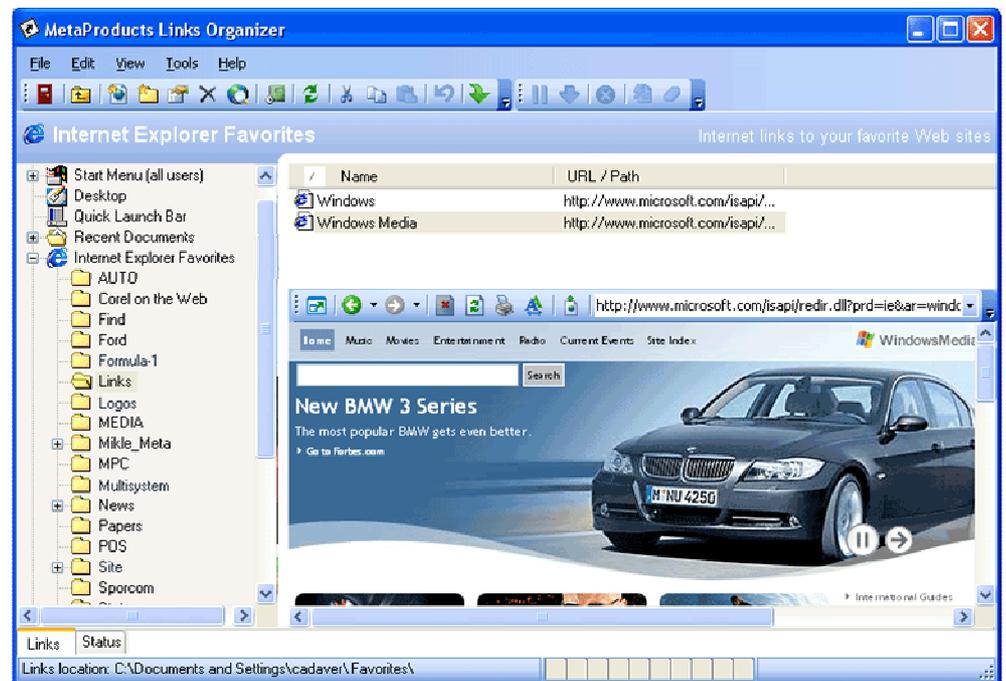

- Microsoft® Windows® 95, Windows 98, Windows 98 Second Edition, Windows Millennium Edition, Windows 2000, Windows NT® 4.0, Windows XP, Windows 2003 or Windows Vista
- 64MB of RAM, or the minimum memory required to run Windows
- 2Mb of available hard-disk space

Related products:

- Startup Organizer

Main features include:

- Links Organizer supports all popular Web browsers
- It also loads links and shortcuts from: Start Menu, Desktop, Quick Launch Bar, Recent Documents
- Links Organizer has an additional category - scheduled links. This allows you to check links for changes at a certain time.
- Internal browser - in addition to managing links, you can browse them
- The internal browser is also a tool that can save time if you often fill out HTML forms on Web pages. You can save previously completed form contents as a link. When you browse that link again, the Internal browser will restore the saved form contents.
- Links Organizer can check your links to see if pages have changed or if links point to moved or missing pages. You can check one or more links at a time.
- Scheduling link checking gives you even more power! You can ask Links Organizer to send you the check results by E-mail or to your ICQ pager.
- Links Organizer includes a handy tutorial page that will show you the main features of the program and teach you how to do certain tasks
- It is possible to import/export your links. Links Organizer supports text, CSV (Comma-Separated Values) and HTML formats.
