## Internet media streams and files downloader

### Accelerate your downloads and manage downloaded files with Mass Downloader!

#### Product Description

Mass Downloader makes it easy to download video/audio streams and files from Internet sites at the maximum available speed. Download resume is supported. Multiple channels technology significantly reduces download time.

#### Universal downloader

Mass Downloader supports a wide range of downloads, including regular and secured (HTTPS) Web sites, FTP servers, Real Media, WinAmp and Microsoft Media stream servers. The support of stream protocols makes it simple to download streaming video and audio for offline viewing.

#### Remote Zip browsing

Mass Downloader also allows you to browse Zip archives before loading them and to choose only the desired files to download. The program will download only the selected files into the resulting Zip archive.

#### Easy to use

Mass Downloader has an excellent Internet Explorer-like user interface. You can configure the program view to display the desired level of detail about download progress, file properties and placement.

#### Ability to preview media

During the media file download it is possible to right-click the partially downloaded file and select the Preview context menu item. Mass Downloader will combine the downloaded parts and open the file in the default player without interfering with the download process.

#### Easily find downloaded files

Mass Downloader keeps a history of all added and downloaded files. It is useful when you want to find a previously downloaded file – just open the History panel and use the integrated search by filename, size or date.

#### Browser integration

The program can integrate with all popular Internet browsers, including Internet Explorer, Opera, FireFox, Mozilla and Netscape Navigator. If you do not want to use browser integration, you can add your downloads by dragging links to Mass Downloader's window or its Drop Box or by using the Clipboard monitoring feature.

## Main Mass Downloader features:

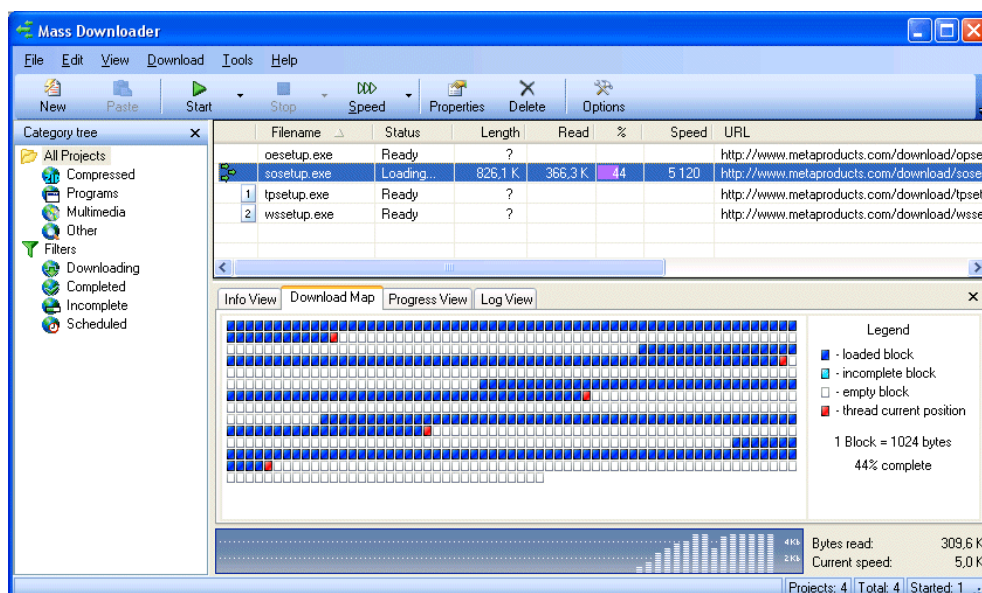

- HTTP, FTP, HTTPS, RTSP, MMS, MMST protocol support
- Ability to pause and resume downloads (when the source server supports this feature)
- The ability to preview ZIP-archives contents and load only the desired files
- Internal FTP Browser
- Maximum Internet connection bandwidth usage when loading several file parts simultaneously
- Fully configurable user interface
- Download scheduling
- Automatic dialer to connect to your Internet Service Provider
- History of all loaded files allows you to easily find them on disk and to get additional server and download information
- The ability to work in automatic mode

## System requirements:

- Microsoft® Windows® 95, Windows 98, Windows 98 Second Edition, Windows Millennium Edition, Windows 2000, Windows NT® 4.0, Windows XP, Windows 2003 or Windows Vista
- 64MB of RAM, or the minimum memory required to run Windows
