

# MetaProducts Offline Browser

## MetaProducts Offline Browser: Offline Browsers Have Never Been So Easy to Use!

### Product Description

MetaProducts Offline Browser is an offline browser/Web site download utility. It has a simple user interface and attaches its toolbar to the browser window. Supported browsers: Internet Explorer, Safari, Chrome, FireFox and Opera.

MetaProducts Offline Browser downloads Web pages or entire Web sites, including images, sounds, video and other media files to your hard disk, flash drive or memory card. This will enable you to browse saved content while offline.

Save e-books, news articles, photo galleries and more to your drive so that you can browse them whenever an internet connection is unavailable

### Be Portable!

MetaProducts Offline Browser lets you take Web sites with you when you travel with your laptop computer. Even if the online content moves or changes, your files remain intact. You can even save streaming audio and video files to your flash disk and play them back at the highest quality. Best of all, the downloaded Web sites can be viewed on Windows, Macintosh, and Linux computers.

### Save Time

With its ability to download many files simultaneously, MetaProducts Offline Browser lets you quickly and easily move Internet data to your hard disk or USB Flash drive, where you can browse at your leisure much faster than when connected. And you can download during off-peak hours. The files are always available to you, so there's no down time.

### Floating Toolbar

The application appears as a handy, floating toolbar near the upper right corner of your Web browser. Browse to the page you want to save and click Download to begin downloading the page to your disk. The page will be placed in the MetaProducts Offline Browser's WebList. The WebList allows you to manage downloads in many ways - browse downloaded pages offline, delete unnecessary downloads or change the download options to download a larger part of the site. When you don't need it, it is easy to minimize MetaProducts Offline Browser to the Windows Notification Tray.

### One Page or Many

MetaProducts Offline Browser allows you to save offline pages you are viewing. You also have the option to download pages linked to the page you are viewing. For example, you are reading the first page of a news portal with news titles (links) listed. Just configure MetaProducts Offline Browser to download this page plus all linked content and you will be able to read the full stories later directly from your disk. (To download more than the page you are viewing please use the Wizard button of the MetaProducts Offline Browser Main Menu.)

### Modern Technologies

MetaProducts Offline Browser provides support for JavaScript, Java Classes, Cascading Style Sheets (CSS), Macromedia Flash, and Table of Contents files. The program supports Adobe Acrobat (PDF) files, including links to other PDF files. The software also includes support for downloading stream protocols from audio and video hosting sites. MetaProducts Offline Browser can use HTTPS protocol for downloading from secure web sites.

## Main features include:

- Handy floating toolbar
